

AGROCONNECT

Startup Business Plan & IT Project Roadmap

Location: Akure, Ondo State, Nigeria

1. Executive Summary & Market Reality

AgroConnect is a digital marketplace specifically designed to bridge the gap between farmers in **Akure** and urban consumers. By focusing on a hyperlocal model, we address post-harvest losses and supply chain inefficiencies directly at the source.

1.1 Regional Advantage: Why Akure?

- **Proximity to Production:** Akure is surrounded by major agricultural hubs like Idanre, Owo, and Ondo town, known for cocoa, tubers, and vegetables.
- **Targeted Upscaling:** Starting in a specific zone (Akure) allows for operational excellence before expanding across Ondo State and Nigeria.
- **Infrastructure:** Access to a growing population of students and civil servants who require convenient, fresh food delivery.

1.2 Market Competition & Gaps

Platform	What They Do	Gap AgroConnect Fills
CartAGRO	Digital marketplace; global focus.	Hyperlocal focus in Akure/Ondo.
Vendease	B2B for large restaurants.	Individual households and small vendors.
Local Markets	Traditional physical trade.	Convenience, delivery, and traceability.

BRAINSTORMING ISSUE: Market & Payment Structure

Currently analyzing the best connection methods between local farmers and final consumers (retailers, wholesalers, vendors, and foodsellers).

2. Core Concept & Features

Mission: To make fresh farm produce from Akure accessible to every buyer, ensuring fair pricing for farmers and quality for consumers.

BRAINSTORMING ISSUE: Trust & Verification

How to ensure produce quality, verify payments securely, and establish a fair return/refund policy.

PROPOSED SOLUTIONS:

- **Trust System:** Ratings, comments, and reviews from real customers.
- **Communication:** Integrated chat rooms between buyers and sellers.
- **Onboarding:** Tutorial videos to help users navigate the web app easily.

OPEN CHALLENGE: USP (Unique Selling Point)

Defining the specific factor that makes AgroConnect the primary choice for Akure residents over traditional markets.

3. Roadmap & Progress

Stage	Focus	Status
1. Research	Akure farmer outreach & logistics planning.	In Progress
2. MVP Build	React + Tailwind frontend development (IT Project).	Active
3. Manual Ops	Initial 10 orders within Akure zone.	Pending
4. Iteration	Adding chat, reviews, and tutorial video.	Pending
